

Environmental Policy

Natural resources are the key aspects of our quality of life and that of future generations: it is therefore essential to protect them and guarantee efficient use of the same.

Minifaber fully acknowledges its responsibility in protection and safeguarding the environment and the context within which it operates. For this reason, all the activities are organised and carried out according to an Environmental Management System that complies to the ISO14001:2015 Standard.

Minifaber undertakes to comply with all laws and regulations as regards environmental matters, prevention of pollution and reduction of the impact of its operations.

Its ongoing research on innovation and technological updates, the skills and expertise of its human resources, combined with consistent monitoring of performance, encourages the development and maintenance of excellent occupational conditions and a healthy and sustainable work place.

Every individual within the company is called upon to comply with such obligations and behave in a manner which ensures such regard for the environment.

Minifaber encourages high levels of cooperation with institutions, public and private entities, associations, customers and suppliers which leads to constant exchange of environmental related information, skills and best practices aimed at achieving higher ecological advantages for the company.

Senior Management at Minifaber uses sustainable development indicators to ensure continual improvement of the Environmental Management System.

Minifaber Senior Management disseminates and makes this Policy available throughout the organisation to its own resources, to its collaborators and independent resources. It highly encourages the participation and commitment of all parties involved so that all the above aspects are implemented on a day-to-day basis.
